

# **APPENDIX D**

**PHASE I ENVIRONMENTAL SITE ASSESSMENT**

**PROPOSED SCHOOL SITE – STOCKTON SITE I  
CORNER OF WESTLAKE DRIVE & REGATTA LANE  
STOCKTON, CALIFORNIA**

**PROJECT NUMBER: 2019-00014  
June 6, 2019**

This document and its use is intended for the recipient and specific identified users contained within. Any unauthorized use of this report without prior consent is strictly prohibited.

June 6, 2019  
Project No. 2019-00014

Mr. Leonard Kahn  
Chief Business Officer  
1305 E. Vine Street  
Lodi, CA 95240

Subject: Phase I Environmental Site Assessment  
Stockton Site - I  
Corner of Westlake Drive and Regatta Lane  
Stockton, CA 95219  
APN: 066-050-07, -08 (portion)

Dear Mr. Kahn:

We are pleased to present the following report, which contains the findings and conclusions of our Phase I Environmental Site Assessment conducted for the subject site. This report was designed to provide a Phase I Environmental Site Assessment in compliance with the ASTM E 1527-13 Standard and is in accordance with the All Appropriate Inquiries (AAI) rule standard. This report is also developed in compliance with the *Department of Toxic Substances Control Phase I Site Assessment Advisory: School Property Evaluations, Revised September 5, 2001*. Findings for this project have been provided in the body of the report and are listed in the executive summary.

Petalogix Engineering, Inc. uses professionals who meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. As an environmental consulting company, we have the specific qualifications (based on education, professional certification, training, and experience) to assess properties. Petralogix has developed and performed the all appropriate inquiries in conformance with the standards and practices as set forth in 40 CFR 312.

We appreciate the opportunity to provide our expertise on this project and look forward to providing other services in the future. Please feel free to contact us if you have any questions.

Sincerely,  
Petalogix Engineering, Inc.

Tonya R. Scheftner, Project Geologist  
B.Sc. Geology, GIT No. 685

Daniel E. Kramer, President  
Professional Geologist No. 8657

# PHASE I ENVIRONMENTAL SITE ASSESSMENT – IMPORTANT CONSIDERATIONS AND LIMITATIONS

## *Contact Petralogix to Discuss all Questions*

It is important to contact our firm whenever you have any questions. The value in retaining our company for your environmental consulting needs is that we are here to help and guide. No question or comment is unimportant to Petralogix. We can save our clients time, money, and confusion by discussing development components at critical times within a project's timeframe. We are here to help regarding possible environmental conditions that could affect your project.

## *Limitations of the Phase I Environmental Site Assessment (ESA)*

When reviewing and considering the final Phase I ESA report it should be understood that it is not intended to be an all exhaustive end all review. Rather, a Phase I Environmental Site Assessment is written to provide database search results, third party information, observations, and professional opinions regarding a specific site for a specific project, under a specific timeframe.

There are many uncertainties that can exist about a property even with appropriate review being met under the requirements of the AAI and ASTM standards. Additional research can be performed to aid in a higher level of certainty about a site's historic environmental risk. The amount of research required to do this depends on the type of property, the risk tolerance of the client, and information developed in the course of the property review.

This Phase I ESA Report is useable for 180 days from the date of completion. The Report is produced for the client and project owner, and may not be used by a different entity or person without also satisfying the User's Responsibilities and having express consent from Petralogix Engineering, Inc.

## *Client & User Responsibilities*

The ASTM Standard E1527-13 requires the user to be involved in the process and adequately inform professionals of their whole knowledge for a site. In order to meet the requirements to qualify for the innocent landowner defense within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) the following items must be performed.

- **Required** - review title and judicial records for environmental liens or activities and use limitations (AULs).
- **Must** - communicate any specialized knowledge or experience to the environmental professional that is material to recognized environmental conditions in connection to the property.
- **Must** - communicate any actual knowledge of environmental liens or AULs encumbering the property to the environmental professional.
- **Shall** - consider the relationship of the purchase price of the property to the fair market value. If the amount is lower, a written explanation of the lower value is required.
- **Must** - communicate commonly known or reasonably ascertainable information about recognized environmental conditions in connection to the property to the environmental professional.

**PHASE I ENVIRONMENTAL SITE ASSESSMENT**  
**CORNER OF WESTLAKE DRIVE & REGATTA LANE**  
**STOCKTON, CALIFORNIA**  
**OUR PROJECT NO: 2019-00014**

**1.0 SUMMARY**

Petralogix Engineering, Inc. has been retained by the Lodi Unified School District to conduct a Phase I Environmental Site Assessment for the property located at the corner of Westlake Drive & Regatta Lane, in Stockton, San Joaquin County, California. The site is currently one entire parcel plus a planned merge with a portion of the adjacent parcel; the site assessor parcel numbers (APNs) are 066-050-070-000 and portion of 066-050-080-000, respectively.

Our firm conducted a Public Records review, in which information was obtained from both federal and state databases. Petralogix uses Environmental Data Resources Inc. (EDR) to assist and supply many of these documents. In addition, we have supplemented this data with regional and local sources to determine whether or not obvious recognized or historically recognized environmental conditions (RECs) may exist (and/or be known to exist by regulatory agencies) for the site. The search radius for this investigation extended to adjoining properties, and properties within a search distance varying from one-eighth to one mile, depending on the information type that was being researched.

Background and past uses of the subject property were investigated in great detail. Sources describing the physical characteristics of the property, many of the surrounding properties, and the general region were compiled for review. These sources were studied in order to determine the topography, geologic setting, and groundwater depth and flow direction beneath the property. Site reconnaissance of the subject property was also performed. Immediate surroundings were also reviewed during our site reconnaissance. The complete data review and summary required for compliance (under the ASTM and AAI standards) can be found in the body of this document. This assessment was conducted under the supervision of Daniel E. Kramer, Chief Professional Geologist (PG#8657) and President of Petralogix.

## 1.1 Executive Summary

### 1.1.1 Findings

The site consists of vacant land. The overall parcel, pending a proposed property line adjustment, is approximately 19.36 acres in size. The current parcel includes a sewer lift station in the northeast corner, and an approximately 1.5-acre basin along the south-southeast portion of the property. The parcel is not fenced, however, there is a locked gate and k-rails at the entrance along the corner of Westlake Drive & Regatta Lane. The general vicinity consists of residential and agricultural use.

Based on the historical aerial photographs and topographic maps, the subject property was agricultural land from at least 1937 to 1998. Pesticides and herbicides may have been applied to the subject property during historic agricultural use; the subject property may have been impacted from persistent Organochlorine Pesticides (OCPs) therefore the historic agricultural use is considered an environmental concern to the site. Based on historical aerial photographs and topographic maps, the southeastern portion of the subject property may have had up to two historic structures present from at least 1937 to 1947; the former on-site structures were built and demolished prior the effect ban of asbestos containing building materials and lead paints and products. Therefore, the potential for lead-based paints and asbestos located in the former structure locations is considered moderate to high, as well as the potential for heavy metals or total petroleum hydrocarbons. The demolished structures are considered a REC to the site.

Based on historical aerial photographs, beginning in at least 2006 and likely coinciding with tract housing development in the immediate area, the eastern half of the subject property appears to have disturbed earth with soil piles staged onsite. The soil piles may contain contaminants from unknown sources. In addition, an approximately 1.5-acre basin located on the southern boundary is developed from at least 2006; the basin may have been associated with construction activities and may contain contaminants from unknown sources. The soil piles and basin are considered Recognized Environmental Concerns.

One ground-mounted transformer located on concrete was observed in good condition located within the subject property boundary. Based on the observed condition and concrete foundation, the transformer is not considered an environmental concern.

Surrounding land appears to have been primarily agricultural land developed into residential and residential agricultural lots over time, with some commercial and industrial use interspersed. Three (3) ENVIROSTOR sites were reported within approximately 0.75 miles to 2.25 miles of the subject property. Based on a review of the ENVIROSTOR database, no RECs were identified in connection with the subject property.

## ***ENVIRONMENTAL PROFESSIONAL?***

*A person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding the presence of releases or threatened releases (per ASTM Standards E1527)*

**&**

*In California such a person must hold a current Professional Engineer's or Professional Geologist's license.*

### 1.1.2 Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 for property located at the corner of Westlake Drive & Regatta Lane, Stockton, California, (the subject property). Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment identified the following recognized environmental conditions (RECs) in connection with the subject property:

- Pesticides and herbicides may have been applied to the subject property during possible agricultural use from at least 1937 to 1998 and may be impacted from persistent Organochlorine Pesticides (OCPs). The former agricultural use is considered a REC to the site.
- The southeastern portion of the subject property may have had up to two historic structures present from at 1937 to 1947. The former on-site structures were built and demolished prior the effect ban of asbestos containing building materials and lead paints and products. Therefore, the potential for lead-based paints and asbestos located in the former structure locations is considered moderate to high, as well as the potential for heavy metals or total petroleum hydrocarbons. The demolished structures are considered a REC to the site.
- Based on historical aerial photographs, beginning in at least 2006 and likely coinciding with the tract housing development in the immediate area, the eastern half of the subject property appears to have disturbed earth with soil piles staged onsite. The soil piles may contain contaminants from unknown sources. In addition, an approximately 1.5-acre basin located on the southern boundary is developed from at least 2006. The basin may have been associated with construction activities and may contain contaminants from unknown sources. The soil piles and basin are considered Recognized Environmental Concerns.

### 1.1.3 Recommendations

Further investigation is recommended to evaluate whether environmental media has been impacted by a release from historic agricultural practices, demolished structures, soil piles, and a basin potentially impacted by unknown activities.

## **2.0 INTRODUCTION**

### **2.1 Purpose**

In order to obtain State funding for school property acquisition or new construction, the California Educational Code (CEC) § 17213.1 requires a school district to conduct a comprehensive Phase I Environmental Site Assessments (ESA) be conducted to determine whether there has been, or may have been, a release of hazardous materials or the presence of naturally occurring hazardous material. The CEC requires DTSC to review the Phase I ESA and to make a determination regarding any need for further action or remediation. The main objective of any study should be to determine current and/or past occupants (or surrounding land uses) which could adversely impact property development, the environment, or the human health.

**Performance of a Phase I Environmental Site Assessment according to ASTM Standard E1527-13 and the All Appropriate Inquiries (AAI) rule satisfies one of the requirements to qualify for landowner liability protections (LLPs) within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). Under the Education Code, DTSC's review of Phase I ESAs is performed for the sole purpose of identifying RECs at the school site in accordance with the requirements of the Education Code, for determination of further investigation if necessary. DTSC's approval of a Phase I pursuant to Education Code § 17213.1(a) does not establish confirmation that the "All Appropriate Inquiry" has been conducted within the meaning of CERCLA.**

The purpose of this Phase I Environmental Site Assessment is to identify to **the extent feasible**, pursuant to the processes prescribed by the AAI rule and in ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, recognized environmental conditions in connection with the property. Additional investigative procedures, designed to meet the due diligence criteria specified by many lending institutions, have also been implemented. As defined by ASTM<sup>1</sup> E1527-13, §1.1.1, the term "recognized environmental conditions" or (REC) refers to:

*"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any **release** to the environment; (2) under conditions indicative of a **release** to the environment; or (3) under conditions that pose a material threat of a future **release** to the environment."*

Under CERCLA the definition of a **release** is given as:

*42 U.S.C. § 9601(22) defines a "**release**" as "any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discharging of barrels, containers, and other closed receptacles containing any hazardous substances or pollutant or contaminant."*

It is important to note the issuance and consideration of Business Recognized Environmental Concerns, Historic Recognized Environmental Concerns (HREC), and/or Controlled Recognized Environmental Concerns (CREC). Each of these items is more clearly defined in the regulatory literature and standards. We have considered the application of these definitions as part of this review. We do this to help determine impact significance for sites which once had items of recognized concern due to use and or historic practice, but for which a cleanup or change of regulatory law and regulation has removed the hazardous condition from the site.

---

<sup>1</sup> American Society for Testing and Materials, [www.astm.org](http://www.astm.org)

## ***ASTM STANDARDS AND REQUIREMENTS***

*Phase I ESAs must be conducted in accordance with the current version of American Society for Testing and Materials International (ASTM) Standard E1527 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", ASTM International in conjunction with ASTM Standard E1528 "Standard Practice for Environmental Site Assessments: Transaction Screen Process", ASTM International. For referenced ASTM standards, visit the ASTM website, [www.astm.org](http://www.astm.org), or contact ASTM Customer Service at [service@astm.org](mailto:service@astm.org). Contact Petralogix to discuss these requirements in more detail. If preferred, we can come to your office and present a 30-minute power point on the ASTM Standard as topic for better understanding. Contact us at [questions@petraolgix.com](mailto:questions@petraolgix.com) to setup a presentation.*

### **2.2 Detailed Scope-of-Review**

The scope of work performed to develop the information contained in this Phase I Environmental Site Assessment report includes:

1. Collecting available information concerning the property
2. Review of other data pertinent to the specific site
3. Conducting a site visit to assess physical features, observe adjacent land use, and gather evidence of indiscriminate and/or illegal waste disposal
4. Conducting a review of regulatory agencies' records
5. Contacting appropriate regulatory personnel,
6. Reviewing regulatory files regarding the property in question.
7. Detailed discussions with both the Client and all previous owners who are available to discuss the history of the site.

No previous environmental assessments were identified for review.

This Phase I Environmental Site Assessment discusses all work performed by Petralogix to date with regard to this specific project. The principal findings are outlined throughout the body of this text and are summarized in the conclusion of this report.

### **2.3 Significant Assumptions**

No significant assumptions were made in the course of this assessment. To clarify, a significant assumption is defined in the following statement: "things and/or items that were based on speculative reports or study, or which were not verified through rigorous evaluation and objective review."

### **2.4 Limitations and Exceptions**

This report was compiled as a Phase I Environmental Site Assessment for the subject project. This report contains information and data that was provided to Petralogix by a variety of outside sources. Petralogix cannot warrant the accuracy and/or completeness of the information which was provided to us by those sources.

When an assessment is completed without adequate subsurface exploration or chemical screening very little certainty (or conclusive statement) can be made about the conditions of the soil and groundwater beneath a particular site. As is the case with this study, uncertainty regarding latent subsurface conditions which may be the result of on-site or off-site sources exists. In order to best determine with certainty these conditions, physical testing would be required. *Therefore, the findings and conclusions of this report are not scientific certainty, but rather a statement of probability based on professional judgment. These statements of probability are based on the data gathered during the course of this investigation.*

Petralogix is not able to represent that the site or adjoining land contains no hazardous waste, oil, underground storage tanks, or other latent condition beyond that detected or observed by Petralogix during the Phase I Environmental Site Assessment. Without physical tests and additional review for those sites, we can determine no definite answer. A possibility always exists for contaminants to migrate through surface water, air, or groundwater. An investigation to determine whether or not contaminants are present in the surface and subsurface soil is not within the scope of work required to produce the Phase I Environmental Site Assessment. Chemical analysis of soil and groundwater samples to quantify levels of contamination are also not within the scope of work required to develop a Phase I Environmental Site Assessment.

As discussed in ASTM E1527-13, it is never possible to eliminate all uncertainty from an investigation of this type:

No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.

For this assessment, there were no specific limitations identified.

## 2.5 Special Terms and Conditions

As part of this certain materials are not fully evaluated including Asbestos, Mold, Radon, Vapor, or Lead. These are discussed and considered, but we are not proposing to provide characterization of these items (nor is characterization required or intended within the ASTM scope). Intention here is directed towards screening.

Our office has not been provided with any specific criteria for the development of this report that is separate from the general request to evaluate the property in question for possible problems related to toxic or hazardous agents. We have not been directed to address any specific questions concerning the site. If there is a need to conduct an investigation into a specific question not addressed in this report, please contact Petralogix immediately regarding your concerns.

## 2.6 User Reliance

This report was prepared for the exclusive use of Lodi Unified School District. No other person or entity is entitled to use or rely upon this report without specific written authorization from Petralogix. Such reliance is subject to the same limitations, terms, and conditions as our original contract with the above stated client(s). Petralogix specifically rejects any responsibility for unauthorized use of this report. Unauthorized use is any use that is not consented for by Petralogix in writing. This Phase I ESA is only reliable for 180 days from the date of the completion, June 6, 2019.

### ***180 Day Limitation?***

*Phase I ESAs are only valid for 180 days. Many clients want a more detailed explanation of why. Over time, conditions may change at the site which cause an impact and form an environmental liability. There are many examples of this happening. One value of retaining the same professional with time is that the revised and updated Phase I ESAs are generally more simplified than if using multiple consultants.*

## 3.0 SITE DESCRIPTION

### 3.1 Location and Legal Explanation

The subject property has no site address; the subject property is located at the corner of Westlake Drive & Regatta Lane, Stockton, San Joaquin County, California (APNs: 066-050-070, -080). Agricultural land borders the site to the north and west; Westlake Drive and Regatta Lane borders the site to the north and east, respectively. Bear Creek is adjacent south, followed by agricultural land. The site is located in Stockton and is generally surrounded by residential homes to the east and agricultural use north, south, and west, with some commercial use further east in the general vicinity.

A general location map (Vicinity Map – Plate 1) and a general site map showing survey photograph locations (Site Map – Plate 2) are attached to this report in **Appendix A**. Photographs from the onsite field survey of the subject property are attached to this report as **Appendix B**.

### 3.2 Site and Vicinity Features

The site consists of vacant land. The overall parcel, pending a proposed property line adjustment, is approximately 19.36 acres in size. The current parcel includes a sewer lift station in the northeast corner, and an approximately 1.5-acre basin along the south-southeast portion of the property. The parcel is not fenced, however, there is a locked gate and k-rails at the entrance along the corner of Westlake Drive & Regatta Lane. The general vicinity consists of residential and agricultural use.

### 3.3 Current Use – Property

### 3.4 Descriptions of Structures, Roads, Other Improvements for the Site

The property is currently vacant land, with the exception of the sewer lift station located in the northeast corner of the subject property.

### 3.5 Current Uses - Adjoining Properties

To the north is Westlake Drive followed by agricultural land; west is agricultural land. To the east is Regatta Lane followed by residential tract homes. To the south is Bear Creek, followed by agricultural land.

### 3.6 Physical Setting

#### 3.6.1 Topography

According to the most recent United States Geological Survey Topographic map covering the subject property and vicinity<sup>2</sup>, the subject property is at an elevation of approximately 0 feet above mean sea level. The site is relatively flat. The general area slopes shallowly toward the west-southwest.

#### 3.6.2 Geology and Soils

According to the most detailed Geologic Map covering the subject property and vicinity, the majority of the subject property consists of loose sand and silt, chiefly fluvial, compact silt, and very fine sand undifferentiated alluvial-fan deposits, derived from glaciated drainage basins of the Pleistocene aged Modesto Formation (Qm).<sup>3</sup>

Site soil consists of Ryde clay loam (0-2 percent slopes) and Guard clay loam (0-2 percent slopes) for western and eastern portions of the subject property, respectively. Ryde clay loam is very poorly drained with negligible runoff derived from herbaceous organic material derived from reeds and tules, and fine-loamy alluvium derived from mixed rock sources.<sup>4</sup> Guard clay loam is poorly drained with high runoff derived from alluvium and mixed rock sources.<sup>5</sup>

#### 3.6.3 Hydrogeology

According to the San Joaquin County Spring 2016 and Fall 2016 Groundwater Reports<sup>6</sup> groundwater elevation contour map, groundwater elevation is approximately -22 feet below mean sea level (msl) during spring and -24 feet below msl during fall. The elevation at the site is approximately 0 feet msl, therefore, according to the regional groundwater elevation maps reviewed, depth to groundwater at the subject property is approximately 22 to 24 feet below ground surface (bgs). The groundwater flow direction is east with a gradient of approximately 4.5 and 5.5 feet per mile in the spring and fall, toward a cone of depression.

To supplement regional groundwater report information, groundwater data obtained on the California State Water Resources Control Board's GeoTracker Ambient Monitoring and Assessment (GAMA) website<sup>7</sup> was also reviewed. Groundwater elevation measurements recorded in groundwater monitoring well #02N5E01A006M, located approximately 1.25 miles northeast of the subject property indicates groundwater elevations have ranged from approximately -2.58 feet mean sea level (msl) and -11.58 feet msl as measured periodically between March 21, 2014 and October 17, 2016. Based on a review of the GAMA well data, it is likely depth to groundwater is approximately 3 to 12 feet below ground surface.

## 4.0 USER PROVIDED DATA

### 4.1 Title Records

Chain of title reports were not provided by the client for Petralogix's use in preparing this report. Environmental Data Resources, Inc. (EDR) performed a Title Search to identify any Liens and AULs associated with the subject property located at the corner of Westlake Drive and Regatta Lane, San Joaquin County, California. EDR identified a deed for (APNs: 066-050-070, -080) recorded with the San Joaquin County Recorder dated December 31, 2014, identifying subject property owner as A.G. Spanos Companies. The previous owner was not identified.

### *Orphan Sites*

*An orphan site can be described as a toxic waste area where the polluter could not be identified, or the polluter refused to take action or pay for the cleanup. It therefore is of great significance for due diligence review.*

### 4.2 Environmental Liens or Activity and Use Limitations

EDR performed a Lien and AUL search for the subject property located at the corner of Westlake Drive and Regatta Lane, in Stockton, San Joaquin County, California (APNs: 060-050-070, and -080). No environmental liens or AULs were found for the subject property. In addition, Petralogix reviewed the California EPA Regulated Site Portal<sup>8</sup> and Department of Toxic Substances Control<sup>9</sup> (DTSC) databases. The subject property was not listed either of the databases.

### 4.3 Specialized Knowledge and Awareness

Ms. Vickie Brum indicated no specialized knowledge or experience that is important or relevant to assessing or identifying recognized environmental conditions in connection with the subject property.

### 4.4 Commonly Known or Reasonably Ascertainable Data

Ms. Vickie Brum indicates no knowledge of commonly known or reasonably ascertainable information related to the subject property that was relevant to this study or review.

### 4.5 Valuation Decrease for Environmental Matters

Ms. Vickie Brum indicates the knowledge of valuation reduction of the subject property due to any environmental issues, or otherwise, is not currently applicable to the subject property.

### 4.6 Owner, Property Manager, and Occupant Data

Ms. Vickie Brum indicates she is currently an employee representative for Lodi Unified School District.

<sup>8</sup> <https://siteportal.calepa.ca.gov/nsite/>

<sup>9</sup> <https://www.envirostor.dtsc.ca.gov/public/map/?myaddress=stockton>

#### 4.7 Purpose for Performing Phase I ESA

Ms. Vickie Brum indicates the Phase I ESA has been requested for California Public Education (CPE) Requirements.

#### 5.0 RECORDS EXAMINATION

In preparing this report, Petralogix has engaged the services of Environmental Data Resources, Inc. (EDR) of Milford, Connecticut. EDR provided Petralogix with a list and profile of the recorded sites within the project study area that have been identified by regulatory agencies of significance.

EDR's report #5583838.2s is included as **Appendix D**. The date of the latest agency version of each database searched by EDR and the date EDR acquired the latest update are noted in the EDR report as part of the record for this Phase I ESA.

The EDR governmental database search included a list of "orphan sites." Orphan sites are locations which have a physical existence, but whose exact location is "fuzzy" and therefore, requires additional review to determine relevance to the site in question. These sites were not depicted on the EDR radius map of identified sites. EDR identified 6 "orphan sites". The relevance of these sites is evaluated in section 5.3.3 below.

#### 5.1 Standard Environmental Records

A variety of standard environmental record sources have been reviewed based on the data provided by EDR in order to complete this report. Information on what sources were reviewed and search distances associated with those sources is listed in table form in **Appendix C**.

#### 5.2 Supplementary Environmental Records

In addition to the standard environmental record sources, additional environmental record sources have been reviewed as well. Those sources are listed on the last page of **Appendix C**.

#### 5.3 Environmental Record Discoveries

##### 5.3.1 Subject Property

The subject property is not listed on any major EDR databases searched at this time.

##### 5.3.2 Surrounding Sites

No adjacent sites were listed on the databases searched; three surrounding properties were listed on the ENVIROSTOR SCH databases searched via EDR. These sites are listed below and discussed in detail.

Facility Name	Location (miles)	Source	Comments
Manlio Silva Elementary School Scott Creek Drive	~ 2,000 feet N Cross-gradient	ENVIROSTOR SCH	The ENVIROSTOR database indicates DTSC oversaw an investigation for contaminants associated with agricultural row crops. No constituents of concern were identified. Date of completion reported as October 23, 2003. This is not considered a REC to the subject property.
Christa McAuliffe Middle School Canyon Circle/Atherton Road	~1.25 miles E Down-gradient	ENVIROSTOR SCH	The ENVIROSTOR database indicates no further action required for the school site after testing was performed in 2001 for potential contaminants of concern associated with historic agricultural use – row crops. This is not considered a REC to the subject property.
Future High School Sanctuary 4543 West Hammer Lane	~2.25 miles SE Down-gradient	ENVIROSTOR SCH	The location is listed as a DTSC school investigation site for constituents of concern associated with agricultural row crop use. No COCs were found and a no further action status was assigned on March 11, 2009. This is not considered a REC to the site.

No information material to RECs were identified based on the databases reviewed.

### 5.3.3 Orphan Sites

EDR identified 6 “orphan sites” without site addresses, site names, or databases assigned.

## 6.0 HISTORICAL USE DATA

### 6.1 Historical Aerial Photographs & Topographic Maps

Aerial photographs and topographic maps of the subject property provided by EDR were reviewed as part of this investigation:

### Aerial Photograph Description Table

Date	Photo Description
1937 1940	The subject property appears to be agricultural rows crops, with a road trending north-south on the eastern boundary, leading to what appears to be two structures in the southeastern portion of the subject property. There is a levy followed by a slough adjacent south. Adjacent north, east, and west are agricultural row crops and irrigation ditches.

1957	The potential one to two structures are no longer present on the southeastern portion of subject property; the subject property consists of agricultural row crops. The general vicinity is similar to the previous photo.
1963 1968 1975 1984	The subject property and vicinity appear similar to previous photograph.
1993 1998	The subject property appears similar to the previous year (1984). The general vicinity appears similar to the previous year (1984) with the exception of what appears to be a small structure approximately 2,000 feet north of the slough.
2006	The subject property is no longer agricultural rows. The eastern half of the subject property appears to be disturbed earth; there is what appears to be a retention basin approximately 1.5 acres along the southern portion with approximately 3 acres of what appears to be soil spoils in the northeastern portion of the subject property. To the north of the subject property is now disturbed land with a new large manmade water feature extending to Westlake Drive. To the east is residential tract homes and residential tract home construction. To the south is the slough followed by agriculture.
2009 2012 2016	The subject property is similar to the previous year (2006), however the retention basin appears dry and there appears to be debris near the northwest corner of the basin. There appears to be a small structure adjacent east of the subject property, near the jog in the boundary. The other adjacent land and general vicinity appear similar to the previous photo.

### Topographic Maps

Date	Scale	Quadrangle	Map Description
1894	1:125,000	Lodi	The subject property is depicted as vacant. The surrounding land appears vacant. There are sloughs depicted on the western portion of the map.
1910	1:24,000	Headreach Castle	The subject property is depicted as vacant land in a marsh or swamp. There is a creek or channel adjacent south. The surrounding land appears vacant.
1939	1:24,000	Lodi	The subject property has a structure depicted in the southeast corner and an unimproved road that trends north-south in the eastern portion of the subject property; the road is adjacent west of

Date	Scale	Quadrangle	Map Description
1942 1947			the structure. The subject property has a levee trending east-west on the southern boundary. The surrounding area has several structures in the region indicated and unimproved roads and levees are depicted along the creek and sloughs. There are four structures depicted approximately one-quarter mile west and two structures depicted approximately one-quarter mile east of the subject property, respectively.
1952 1953 1968 1969	1:24,000	Terminous Lodi South	The subject property no longer has the structure depicted in the southeast corner. There are what appears to be irrigation canals depicted on the subject property. The two structures noted approximately one-quarter mile east are absent, and the structures noted approximately one-quarter mile west have increased from four to seven. The general vicinity has irrigation canals depicted.
1976 1978 1993 1997	1:24,000	Terminous Lodi South	The subject property appears similar to previous map. The vicinity appears similar to the previous map. Eight Mile Road is labeled approximately one-half mile north of the site, trending east-west.
2012	1:24,000	Terminous Lodi South	The subject property appears similar. There is now a road labeled W Atherton Road adjacent south. The map depicts a residential subdivision adjacent east of the subject property, and Interstate 5 approximately 1.5 miles east. The structures one-quarter mile west are now absent.

Based on the historical aerial photographs and topographic maps, the subject property was agricultural land from at least 1937 to 1998. The southeastern portion of the subject property may have had up to two historic structures present from at least 1937 to 1947. The former structures and historic agricultural use are environmental concerns to the site.

Based on historical aerial photographs, beginning in at least 2006 to 2009, the eastern half of the subject property appears to be disturbed earth with what appears to be soil piles; the disturbed earth and soil piles appear to coincide with the residential development adjacent east. In addition, an approximately 1.5-acre basin located on the southern boundary is developed from at least 2006 to 2016. The soil piles and basin represent a recognized environmental condition.

Surrounding land appears to have been primarily agricultural land developed into residential housing tracts, primarily east of the subject property. These photos and maps are included in **Appendix E**.

## 6.2 Sanborn Insurance Company Maps

An attempt was made by EDR to obtain Sanborn Insurance Company maps in order to determine what types of activities were conducted on the subject property and on adjoining properties. No Sanborn maps for the subject property were identified.

## 6.3 EDR Building Permit Search

An attempt was made by EDR to obtain Building Permit information. No building permits for the subject property were identified.

EDR obtained building permits for the adjoining properties for the years 2007, 2008, 2014, and 2018. No permits material to RECs were identified.

## 6.4 Local Street Directories

R.L. Polk Co., Publishers Directory and SBC Pacific Bell<sup>10</sup> for Stockton were reviewed, including issues dated approximately every five years from 1906 through 2014. No listings were available.

## 7.0 SITE RECONNAISSANCE

A visual reconnaissance of the subject property was conducted on March 14, 2019, by Tonya Scheftner. During the site visit, the weather was sunny and cool. A site map and photographs of the subject property are attached to this report in **Appendices A and B**.

### 7.1 Procedure and Restrictive Conditions

Access to the northwest corner of site was restricted due to dense shoulder high star thistle during reconnaissance visit.

### 7.2 Petralogix Site Visit Worksheet

Site Visit Observations	
<b>Subject Property:</b> <b>Corner of Westlake Drive</b> <b>&amp; Regatta Lane</b>	<b>Weather: Sunny, warm</b>
Describe the current use of the property.	The subject property is currently vacant land. There is a septic pump station in the northeast corner of the site.
Describe evidence of historic uses on the property.	Concrete irrigation pipes observed.

<sup>10</sup> Provided by EDR.

<b>Site Visit Observations</b>	
Is there a Potable Water Source?	None observed.
Is there a Sewage Disposal Source?	No. However, there is a septic lift station for the City of Stockton observed in the northeast portion of the site.
Are there any onsite odors?	None observed.
Are there any pools of Liquid?	None observed.
Are there any electric or hydraulic equipment likely to contain PCBs?	One ground transformer observed in good condition on a concrete foundation located in the northeastern corner of the subject property.
Are there any storage tanks located onsite?	None observed.
Are there any drums or other containers located onsite?	None observed.
<b>Observations – Structure Interior</b>	
Are there any heating/cooling system?	Not applicable.
Are there any stains or corrosion?	Not applicable.
Are there any sumps or drains?	Not applicable.
<b>Observations - Exterior</b>	
Are there any Ponds, Lagoons, and/or Pits?	A basin was observed at the southeast boundary of the site.
Is there any stained soil or pavement visible onsite?	None observed.
Was there any solid waste storage or deposition onsite?	A minimal amount of household garbage was observed dumped along an unimproved dirt road/path in the eastern portion of the site, and some loose garbage was observed in the northeastern corner of the site.
Any noticeable wastewater discharges?	None observed.
Are there any wells or septic systems visible onsite?	One septic pump station observed.
<b>Observations – Vicinity Area</b>	
Describe the topography of property and vicinity.	The subject property and vicinity are relatively flat, with a levy located on the southern boundary.
Describe the current use of adjoining properties.	Adjacent north and west is agricultural land. Adjacent south is the Pixley Slough followed by agricultural land. Adjacent east is vacant land followed by residential tract housing.

<b>Site Visit Observations</b>	
Is there any evidence of past uses?	None observed.
Describe the current land uses in area.	Agricultural, Residential
Describe any evidence of past uses.	Agricultural

## **8.0 INTERVIEWS**

### **8.1 Interview with Owner / Site Manager and Key Individuals**

Ms. Karen Garrett, current Development Manager for The Spanos Corporation (Spanos) was interviewed via an owner questionnaire (**Appendix F**) regarding current and historical use of the subject property. The current property owner is Spanos, purchased in 2015. The previous property owners or any other persons with historical knowledge of the subject property were not indicated. Current use of the property is indicated as former agriculture land being prepared for development. There are no pesticides, paints, and other chemicals stored in containers greater than 5 gallons each at the subject property. There is previously known use of past agriculture with unknown pesticide application indicated. An Environmental Impact Report Draft for West Lake Villages, which includes the subject property was prepared in 2004 to assess overall environmental impacts relating to large scale development.

Ms. Vickie Brum, current Facilities Planner and employee for Lodi Unified School District was interviewed via a user questionnaire (**Appendix F**) regarding current and historical use of the subject property. Ms. Brum indicated the proposed future use of the property is for an elementary school. The Phase I ESA report is requested to satisfy California Public Education requirements.

### **8.2 Interviews with Local Government Offices**

#### **8.2.1 San Joaquin County Environmental Health Department**

The San Joaquin County Environmental Health Department was contacted to determine whether any records were on file at that agency material to RECs in connection with the subject property with APNs 066-050-070, and -080. In addition, environmental records for the three adjacent parcels were requested.

No files were on record for the subject or adjacent properties. No RECs were identified in connection with the subject property.

#### **8.2.2 San Joaquin County Assessor-Recorder**

Petralogix submitted a search request of property records for the subject property available at the San Joaquin County Assessor-Recorder Office. Records identify the current property owner as Stockton Westlake, LLC. for APNs 066-050-070, and -080. Per the assessor-recorder office, the "Parent Parcel" for the subject property was divided into 30 parcels in April 2006, with the previous owner identified as Spanos Corporation.

#### **8.2.3 San Joaquin Valley Air Pollution Control District**

The San Joaquin Valley Air Pollution Control District (SJVAPCD) was contacted to determine whether any records were on file at that agency material to RECs in connection with the subject property. The SJVAPD identified no locations potentially emitting hazardous air emissions or handling hazardous or acutely hazardous materials and substances of waste.

#### 8.2.4 City of Stockton Community Development

The City of Stockton Community Development Department was contacted to determine whether any records were on file at that agency material to RECs in connection with the subject property. According to Cat Pohlman of the agency, contacted via telephone on May 8, 2019, there is one permit for the subject property for a temporary sewer lift pump. This is not considered a REC.

#### 8.2.5 City of Stockton Fire Department

The City of Stockton Fire Department was contacted to determine whether any records were on file at that agency material to RECs in connection with the subject property. The representative confirmed the CUPA for the City of Stockton is the San Joaquin County Environmental Department.

#### 8.2.6 San Joaquin County Office of Agricultural Commissioner

The San Joaquin County Office of Agricultural Commissioner was contacted to determine whether any records were on file at that agency material to RECs in connection with the subject property. The representative, Hiromi Hernandez, indicated that permits are kept for five years. According to the records available by the Agricultural Commissioner, the subject property is located in Reclamation District #2042 which covers M03N05E27 – M03N05E25 to M02N05E03 – M02N05E01. The parcel that encompasses the subject property (APNs 066-050-07 and 066-050-08) is M02N05E02. According to records provided by the Agricultural Commissioner, there is a Restricted Materials Permit No. 39-15-3900651 which covers the MN02N05E02 area in the year 2015 and, according to Hiromi Hernandez, M03N05E03 (Restricted Materials Permit No. 39-18-3900060) should have been entered as MN02N05E02 for 2016 through 2019. These permits indicate the 200 acres were farmed by George Biagi (Biagi Farms) as the applicant, with the actual application areas per pesticide not indicated and therefore unknown. The pesticides/pests list indicated in the permits include the following:

- Aluminum Phosphide for rodents;
- Zinc Phosphide for rodents;
- 2,4-D Amine for weeds;
- Paraquat for weeds;
- Carbaryl for larvae;
- Dicamba for weeds;
- Methomyl for larvae;
- Phorate for aphids;
- Zinc Phosphide for rodents;
- MCPA, Dimethylamine Salt for weeds;
- 2,4-D, Butyl Ester for weeds;
- 2,4-D, Diethylamine Salt for weeds;
- Paraquat Dichloride for weeds; and
- Methidathion for larvae.

Conditional use permit conditions for the pesticides include restricted materials near schools where no applications of restricted materials shall be made by air or ground within 660 feet of a school in session, or when a school sponsored event is in progress. San Joaquin County Agricultural Commissioner permits are included in **Appendix G**.

#### **9.0 MOLD ASSESSMENT SCREENING**

Mold assessment screening is not applicable to the vacant subject property.

#### **10.0 LEAD SCREENING EVALUATION**

The onsite structures were built and demolished from the late 1930's to the late 1950's, prior to the effect ban of lead paints and products. We are not certified lead experts and lead inspection of building materials and intact structures are not a required part of a Phase I ESA evaluation under the ASTM Standard. However, the potential for lead-based paints and products leaching into the soil near the previous location of demolished structures is considered moderate to high. Due to the demolished buildings, lead may be present in the soil; the former structures are an environmental concern to the site.

#### **11.0 ASBESTOS SCREENING EVALUATION**

The onsite structures were built and demolished from the late 1930's to the late 1950's, prior to the effect ban of most asbestos containing building materials. We are not certified asbestos experts and asbestos inspection of building materials and intact structures is not a required part of a Phase I ESA evaluation under the ASTM Standard. However, the potential for asbestos containing building material leaching into the soil near the previous location of the demolished structures is considered moderate to high. Due to the demolished structures, asbestos may be present in the soil where the former structures were previously located. The former demolished structures are therefore considered an environmental concern to the site.

#### **12.0 RADON GAS ASSESSMENT**

Radon gas emissions from the natural breakdown of elements in soil is a concern in many areas around the country. In particular, Radon gas can buildup in confined spaces such as tunnels and basements. A survey of the subject property was not conducted, but a review based on government data was performed. The area in question is listed on the US EPA Radon Check Map as having twenty (20) local tests historically performed. The Federal EPA Radon Zone for San Joaquin County is Zone 3, indoor average level <2 pCi/L. Based on this low potential, Radon is a low concern for the subject property.

### 13.0 VEC & VAPOR INTRUSION SCREENING

The EDR VEC App was used by our firm to perform a Tier 1 Screening for Vapor. This App provides integrated data, analytical tools, and professional reporting searches to help review available environmental records (**Appendx D**). Based on our review, the subject property does not have the potential to cause vapor intrusion/encroachment risk.

In addition, a search area of one-third of a mile was utilized in order to assess potential listings within the region which may have the potential to cause vapor intrusion/encroachment risk. Based on our review, there are no listings that may have the potential to cause vapor intrusion/encroachment risk.

### 14.0 DISCOVERIES & FINDINGS

- Based on the historical aerial photographs and topographic maps, the subject property was agricultural land from at least 1937 to 1998.
- The southeastern portion of the subject property may have had up to two historic structures present from at 1937 to 1947.
- Based on historical aerial photographs, beginning in at least 2006, the eastern half of the subject property appears to be disturbed earth with soil piles; the disturbed earth and soil piles appear to coincide with the residential development adjacent east. In addition, an approximately 1.5-acre basin located on the southern boundary is developed from at least 2006 to present.
- One ground mounted transformer on a concrete foundation is located on the subject property, observed in good condition.

### 15.0 PROFESSIONAL OPINIONS

- Pesticides and herbicides may have been applied to the subject property during possible agricultural use from at least 1937 to 1998 and may be impacted from persistent Organochlorine Pesticides (OCPs). The former agricultural use are environmental concerns to the site.
- The southeastern portion of the subject property may have had up to two historic structures present from at least 1937 to 1947. The former on-site structures were built and demolished prior the effect ban of asbestos containing building materials and lead paints and products. Therefore, the potential for lead-based paints and asbestsos located in the former structure locations is considered moderate to high, as well as the potential for heavy metals or total petroleum hydrocarbons. The demolished structures are considered a REC to the site.
- Based on historical aerial photographs, beginning in at least 2006 and likely coinciding with tract housing development in the immediate area, the eastern half of the subject property appears to have disturbed earth with soil piles staged onsite. The soil piles may contain contaminants from unknown sources. In addition, an approximately 1.5-acre basin located on the southern boundary is developed from at least 2006. The basin may have been associated with construction activities and may contain contaminants from unknown sources. The soil piles and basin are considered Recognized Environmental Concerns.
- The one ground mounted transformer observed on the subject property in good condition is not considered an environmental concern for the subject property.

## 16.0 FINAL CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 for the parcel located at the corner of Westlake Drive and Regatta Lane (APNs: 066-050-07, -08) (the subject property). Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report.

This assessment has identified the following Recognized Environmental Conditions:

- Pesticides and herbicides may have been applied to the subject property during possible agricultural use from at least 1937 to 1998 and may be impacted from persistent Organochlorine Pesticides (OCPs). The former agricultural use are environmental concerns to the site.
- The southeastern portion of the subject property may have had up to two historic structures present from at 1937 to 1947. the former on-site structures were built and demolished prior the effect ban of asbestos containing building materials and lead paints and products. Therefore, the potential for lead-based paints and asbestos located in the former structure locations is considered moderate to high, as well as the potential for heavy metals or total petroleum hydrocarbons. The demolished structures are considered a REC to the site.
- Based on historical aerial photographs, beginning in at least 2009 and likely coinciding with tract housing development in the immediate area, the eastern half of the subject property appears to have disturbed earth with soil piles staged onsite. The soil piles may contain contaminants from unknown sources. In addition, an approximately 1.5-acre basin located on the southern boundary is developed from at least 2006. The basin may have been associated with construction activities and may contain contaminants from unknown sources. The soil piles and basin are considered Recognized Environmental Concerns.

## 17.0 RECOMMENDATIONS

Further investigation is recommended to evaluate whether environmental media has been impacted by a release from historic agricultural practices, demolished structures, soil piles, and a basin potentially impacted by unknown activities.

## 18.0 SPECIFIC DEVIATIONS

No deviations have been taken from this standard.

## 19.0 ADDITIONAL SERVICES

No additional services were provided.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/11/2019	Source: EPA
Date Data Arrived at EDR: 03/14/2019	Telephone: N/A
Date Made Active in Reports: 04/01/2019	Last EDR Contact: 04/18/2019
Number of Days to Update: 18	Next Scheduled EDR Contact: 07/15/2019
	Data Release Frequency: Quarterly

#### **NPL Site Boundaries**

EPA Region 9  
Telephone: 415-947-4246

EPA Region 10  
Telephone 206-553-8665

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/11/2019	Source: EPA
Date Data Arrived at EDR: 03/14/2019	Telephone: N/A
Date Made Active in Reports: 04/01/2019	Last EDR Contact: 04/18/2019
Number of Days to Update: 18	Next Scheduled EDR Contact: 07/15/2019
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991  
Date Data Arrived at EDR: 02/02/1994  
Date Made Active in Reports: 03/30/1994

Next Scheduled EDR Contact: 11/28/2011  
Data Release Frequency: No Update Planned

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/11/2019  
Date Data Arrived at EDR: 03/14/2019  
Date Made Active in Reports: 04/01/2019  
Number of Days to Update: 18

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/11/2019

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 04/17/2019	Last EDR Contact: 03/27/2019
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/08/2019

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/22/2019	Source: Department of the Navy
Date Data Arrived at EDR: 03/07/2019	Telephone: 843-820-7326
Date Made Active in Reports: 04/17/2019	Last EDR Contact: 02/07/2019
Number of Days to Update: 41	Next Scheduled EDR Contact: 05/27/2019
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/04/2019	Telephone: 703-603-0695
Date Made Active in Reports: 03/08/2019	Last EDR Contact: 02/04/2019
Number of Days to Update: 32	Next Scheduled EDR Contact: 06/10/2019
	Data Release Frequency: Varies

#### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/04/2019	Telephone: 703-603-0695

Next Scheduled EDR Contact: 05/11/2019

Data Release Frequency: Quarterly

## **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 01/28/2019

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/17/2018

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/24/2019

## Local Lists of Registered Storage Tanks

### SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994  
Date Data Arrived at EDR: 07/07/2005  
Date Made Active in Reports: 08/11/2005  
Number of Days to Update: 35

Source: State Water Resources Control Board  
Telephone: N/A  
Last EDR Contact: 06/03/2005  
Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

### UST MENDOCINO: Mendocino County UST Database

A listing of underground storage tank locations in Mendocino County.

Date of Government Version: 12/04/2018  
Date Data Arrived at EDR: 12/06/2018  
Date Made Active in Reports: 12/14/2018  
Number of Days to Update: 8

Source: Department of Public Health  
Telephone: 707-463-4466  
Last EDR Contact: 02/21/2019  
Next Scheduled EDR Contact: 06/10/2019  
Data Release Frequency: Annually

### HIST UST: Hazardous Substance Storage Container Database

The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990  
Date Data Arrived at EDR: 01/25/1991  
Date Made Active in Reports: 02/12/1991  
Number of Days to Update: 18

## Local Land Records

### LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 02/28/2019  
Date Data Arrived at EDR: 03/01/2019  
Date Made Active in Reports: 04/02/2019  
Number of Days to Update: 32

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 02/27/2019  
Next Scheduled EDR Contact: 06/17/2019  
Data Release Frequency: Varies

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 03/11/2019

Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 03/04/2019	Source: DTSC and SWRCB
Date Data Arrived at EDR: 03/05/2019	Telephone: 916-323-3400

### **Records of Emergency Release Reports**

#### **HMIRS: Hazardous Materials Information Reporting System**

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 02/08/2019	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 02/08/2019	Telephone: 202-366-4555
Date Made Active in Reports: 03/21/2019	Last EDR Contact: 03/26/2019
Number of Days to Update: 41	Next Scheduled EDR Contact: 07/08/2019
	Data Release Frequency: Quarterly

#### **CHMIRS: California Hazardous Material Incident Report System**

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 10/24/2018	Source: Office of Emergency Services
Date Data Arrived at EDR: 01/24/2019	Telephone: 916-845-8400
Date Made Active in Reports: 03/05/2019	Last EDR Contact: 01/24/2019
Number of Days to Update: 40	Next Scheduled EDR Contact: 05/06/2019
	Data Release Frequency: Semi-Annually

#### **LDS: Land Disposal Sites Listing (GEOTRACKER)**

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 12/10/2018	Source: State Water Quality Control Board
Date Data Arrived at EDR: 12/11/2018	Telephone: 866-480-1028
Date Made Active in Reports: 01/15/2019	Last EDR Contact: 12/12/2018
Number of Days to Update: 35	Next Scheduled EDR Contact: 03/25/2019
	Data Release Frequency: Quarterly

#### **MCS: Military Cleanup Sites Listing (GEOTRACKER)**

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 12/10/2018	Source: State Water Resources Control Board
Date Data Arrived at EDR: 12/11/2018	Telephone: 866-480-1028
Date Made Active in Reports: 01/15/2019	Last EDR Contact: 12/12/2018

	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch
Date Data Arrived at EDR: 01/03/2013	Telephone: N/A
Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 04/17/2019	Last EDR Contact: 03/27/2019
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/08/2019

Number of Days to Update: 339	Next Scheduled EDR Contact: 07/22/2019
	Data Release Frequency: N/A

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

Next Scheduled EDR Contact: 06/17/2019  
Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services  
Telephone: 916-657-4041

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

### USGS TOPOGRAPHIC MAP

Target Property Map:	5619756 TERMINOUS, CA
Version Date:	2012
East Map:	5619734 LODI SOUTH, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

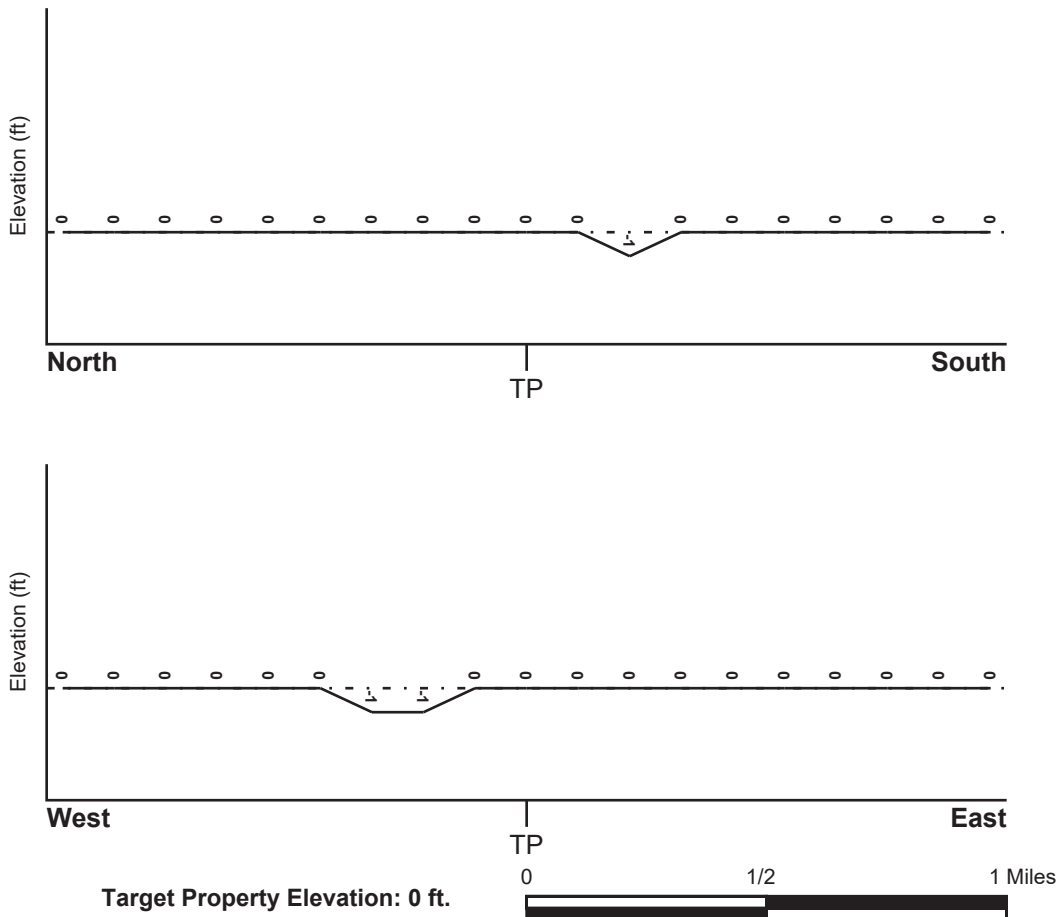

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06077C0295F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06077C0315F	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
TERMINOUS	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: GUARD

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 152 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	14 inches	72 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

#### Soil Map ID: 2

Soil Component Name: RYDE

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Very poorly drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	24 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Organic Clay or Organic Silt.	Max: 14 Min: 4	Max: 7.8 Min: 6.1
2	24 inches	62 inches	stratified muck to silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Organic Clay or Organic Silt.	Max: 14 Min: 4	Max: 7.8 Min: 6.1

### Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:  
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**Soil Map ID: 4**

Soil Component Name: FLUVAQUENTS

Soil Surface Texture: stratified fine sandy loam to silt loam to silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 38 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	14 inches	59 inches	stratified fine sandy loam to silt loam to silty clay loam	Not reported	Not reported	Max: Min:	Max: Min:
2	0 inches	14 inches	silty clay loam	Not reported	Not reported	Max: Min:	Max: Min:

**LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

#### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

### RADON

#### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Petralogix were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.
