Tokay High School Design Build Ball Fields Scope

Tokay HS North Fields:

- Till and level approximately 512,000 ft. of school site north fields.
- Install irrigation for north fields.
- Hydroseed entire north field after leveling and installation of irrigation.
- Demo existing softball and baseball backstops.

Softball Field:

- Construct a CIF-dimension softball field in a suitable space in the north fields, including warning track, etc.
- Install a new backstop.
- Install fenced-in dugouts.
- Install a new scoreboard, including electricity and, if necessary, low voltage.
- Address accessibility to softball field as necessary
- Install domestic water line to accessible area for a hydration station.

Baseball Field:

- Construct a CIF-dimension baseball field in a suitable space in the north fields, including warning track, etc.
- Install a new backstop.
- Install fenced-in dugouts.
- Install a new scoreboard, including electricity and, if necessary, low voltage.
- Address accessibility to baseball field as necessary
- Install domestic water line to accessible area for a hydration station.

Project Timeline:

- Award of Contract: July 16, 2024
- Scheduled Notice to Proceed: September 2024
