# 2023 CA Dashboard Measures

Schools and districts with high school graduates will receive a Status Level (as shown in the image below), ranging from Very Low to Very High, for **College/Career Readiness**, which is reflective of what students achieved in high school up until the 2022–23 school year and does not compare against prior year data.

- Districts, schools, and student groups are measured in part on 6 state indicators.
- Each of these indicators reports a result for the current year, Status, and the difference in this status from the prior year, Change.
- Status and Change each have their own performance level ranges.
- The intersection of these performance levels results in an overall performance color (College and Career will only report Status for 2023).
- Green is the minimum goal for all indicators.

# 5 by 5 Grid Example

- Dashboard colors are determined by the intersection of Status (row data) and Change (column data).
- **Status** performance levels for each indicator range from Very Low to Very High
- **Change** performance levels for each indicator range from Increased Significantly to Declined Significantly.
- Cut points for Status and Change **vary** depending on the indicator type.
- Suspension and Academic Performance indicators have different ranges depending on district and school type.

**Chronic Absenteeism Indicator**
